

Dear Pandacorn parents,

Our thematic unit for November was "environment." It was so interesting! We learned about different landforms, as well as how to keep our beautiful planet healthy.

How can we protect our environment? The answer begins with 3Rs: Recycle, reduce and reuse. Recycle by making old new. Reduce by limiting waste and reuse by using items more than once. This is what we did! We recycled old water bottles into beautiful flower pots! We reused the bottles and reduced waste.

A science project took place in November: we created a valley. Using clay, we made mountains and, in between, we added a campfire. It looked so real!

We also used twigs and leaves to make a beautiful creation and we tried blow painting. It was hard at first, but we tried our best and designed beautiful patterns.

During our November theme party, we made bubbles. Seeing them fly around us and pop up suddenly was hilarious. We also made pudding. We let them sit in the fridge and, after lunch, we flipped the jars upside down. The pudding fell onto our plate. They looked like mountains. We added some caramel sauce and whipped cream. It was so yummy!

There were 5 birthdays in November: Omesh, Bhavya, Manikarnika, Seijin and Fatima. Happy birthday everyone!

We were sad to see Amalia and Aiden go. We will miss you, guys. Don't forget your UIA friends.

We are practicing hard for Winter Concert and look forward to showing you our performance on December 10.

Kind regards,

The Pandacorn Team
